

Be-Safe Technologies Ltd

Company Summary

>>> MAKING **SAFETY AT WORK** A REALITY

Be-Safe Technologies Ltd

Best Health & Safety Management Platform 2022:
Compliance Genie

Be-Safe

Be-Safe Technologies Ltd (Be-Safe) is a company offering an award-winning health & safety App - The Compliance Genie™.

The Compliance Genie™ is an all-in-one cloud-based Health and Safety App that has a comprehensive range of features and benefits that any company in any industry can use to both digitise their H & S processes and also improve the efficiency of them as well. Everything works in real time and can be used on site, on the go or in the office and by contractors as well as employees.

Signing In/Signing Out, Audits, Incident Reporting, Near Misses, Inductions, Equipment Management Training and more! And all customisable to what YOU want.

Be-Safe have also been awarded ISO 27001: 2017 (Information Security Management) and ISO 9001:2015 (Quality Management)

We are experienced in:

Developing and operating complex Technology Platforms

Delivering of innovative solutions

Running successful national and international businesses

Operating within all vertical markets with a requirement for Health and Safety

Health and Safety Management

The Compliance Genie™

Why we invented it?

Benefits of digitalisation

- Shield **Simplify** the Sign In Process
- Shield **Reduce** Risks
- Shield **Fewer** Accidents
- Shield **Fewer** Employee Absences
- Shield **Reduced** Admin Costs
- Shield **Increased** Efficiency
- Shield **Increased** Productivity
- Shield **Increase** Visibility
- Shield **Avoid** costly fines and litigation

Features

Documentation Distribution and Sign Off

- Remotely deploy documents to your team
- Capture sign off in real time validated with photo capture and GPS
- Deploy revisions in real time and ensure no end user has access to previous versions

Point of work Risk Assessments

- Make vital Point of Work Risk Assessments Simple
- Define business specific control measures
- Streamline authorisation of point of work risk assessments

Accident and Incident Reporting

- Capture crucial accident and incident statistics
- Receive real time reporting and have data presented in live custom dashboards
- Make completion process more intuitive and monitor trends

Induction Delivery

- Deliver content rich inductions featuring videos, documents and even checklists
- Systematically ensure every member of the workforce is inducted
- Define induction refresher requirements and have the system execute them

Safety Audits

- Create custom and relevant safety audits
- Streamline the process and use logic to escalate findings
- Utilise photo and video capture to make reports more engaging

Managing Equipment

- Manage equipment regulation compliance
- Complete custom pre-use checks and weekly inspections
- Store documentation and completed checks against specific items

Time and Attendance

- Know who is on site and when they got there
- Systematically ensure they are inducted and meet minimum training requirements
- Capture photos at point of sign in and GPS coordinates

On The Go

- Drive engagement through ease of access
- Streamline process and receive real time data
- Positively impact safety culture

Time and GPS stamped

- GPS Time Tracking gives real-time view of employees whereabouts
- Time, date and GPS stamping crucial when an incident occurs
- Enables efficient management of remote work force

Barnwood

Case study

Barnwood Ltd already used several web and app-based applications but wanted a product that would give them access to all the solutions they needed in one product.

Nathanael Challacombe, Group HSQE Manager:

“We particularly wanted a product that would provide analysis and a means to desk top audit effectively and efficiently.

We previously used software to help us with the following:

- HSQE Audits
- Near miss notifying
- Prestart induction
- Point of Work Risk Assessments
- Web based signing in

The Compliance Genie wraps all of these five different apps into one easy-to-use product.

We also wanted a system that would link to our internal intranet and with the API in development this will be a possibility.

The team at Be-Safe Technologies have engaged with us from concept and helped us to successfully on-board.

Having a friendly single point of contact has been great and the engaging collaborative approach suits Barnwood.

“The Compliance Genie is paving the way for Barnwood to digitalise our HSQE systems and providing greater visibility for site teams, management and support teams to monitor performance through the dashboards.”
Nathanael Challacombe

I also like that fact that we can share our ideas with the team at Be-Safe and **The Compliance Genie** is aimed to be tailored to how we work and not have to change our processes and digital forms to a prerequisite set of fields.

For example, using **The Compliance Genie** we quickly introduced a Waste Transfer Note system removing the need to order triplicate coloured log books. A simple digital form on **The Compliance Genie** speeds up the process and is accessible to our Plant and Transport department and the HSQE team.

Our ISO Auditors also liked the system as the digital records were straightforward to access and a data trail showed how we complied with legislation and ISO standards in our recent audit.”
