Anyone who works in **Health & Safety** in any type of industry has an ever changing set of problems that come with **keeping a company safe, secure, and compliant:**

BE SAFE TECHNOLOGIES

Problems working in Health and Safety

Compliance in relation to Health and Safety in the workplace and while on site must be achieved

Ever changing rules and regulations must be followed - by law

The safety of every employee is the responsibility of every company and their Directors

There are often multiple different processes and checklists, and assessments and documentation must all align

Management of the processes is convoluted and inefficient – and all on paper!

Time consuming paperwork costs money

Fines and litigation can be damaging and huge

Current technology is varied and unconnected – often siloed solutions to achieve one goal

Many problems – but now with ONE solution – The Award-Winning Compliance Genie from Be Safe Technologies. With three bespoke modes to ensure simplicity and flexibility The Compliance Genie can help you as soon as you begin to use it.

Personal Mode - Specifically designed for use by your remote roaming workers, engineering and health & safety teams to streamline the processes specific to them, and drive engagement from within them. Personal mode gives your team quick access to inventory records, site and machine sign on as well as key documentation - All of this information at their fingertips deployed via the cloud in real time.

Dedicated Mode - Designed to revolutionise the traditional site file or workstation ring binder - this mode gives you the ability to access relevant documentation and complete digital checklists whilst also automatically delivering inductions and training to members of the team and capturing time and attendance data too.

Desktop Mode - The mode that management and senior management teams will use on a daily basis. Design bespoke dashboards and reports detailing your performance against your KPIs. Key office based decision makers in the businesses are equipped with the tools to manage their processes, identify opportunities for improvement and track corrective action close outs. All of this from one centralised system in real time.

The Compliance Genie - Making Safety at Work a Reality.
